

The amount of discharging water is adjustable with the engine revolution counter.

New

Lotus Root Digging Machine LA20DM

★The engine revolution counter is set on the operation panel.

You can choose the most suitable amount of discharging water by the throttle operation, enable to work with great efficiency.

★Excellent workability

The pump is placed offset to the left front for easy hose connection.

Use 4 inches (B belt x 3) of drive pulley, which is safe even for long hours of work.

★Excellent mobility

Travel part demonstrates high running performance with the suspension of full crawler with extensive achievements. Possible to adjust the speed finely with HST (with sub transmission).

★Reliable maintenance

Fujii is a long-time partner and stays close to our customers with steady supply of spare parts and technical support.

LA20DM Specifications

Specifications of installed pump	Type	Karui KLO-651	Engine	Model	L3E
	Maximum discharge amount	1050 L/min.		Type	Water-cooled diesel engine (3 cylinders)
	Pulley size	4 inch (LB-35x3)		Fuel tank capacity	25 L
	Diameter	65 mm		Maximum output	14.7 kw (20 ps)
	Travel device	HST variable speed (with sub transmission)		Starting device	Starter motor
Travel section	Travel clutch method	Belt tension	Dimesions	Length x Width x Height	2265 mm x 1133 mm x 1115 mm
	Side clutch method	Gear dock		Weight	650 kg
